

There are no guarantees in nature, but there are with Syngenta. Only Barricade® herbicide offers you a guaranteed crabgrass control program. How can we do this? Because we know Barricade is the only herbicide that offers you both the long residual and the performance that can last throughout the season following application. Its low solubility and volatility mean it stays put in the weed germination zone and won't break down even after heavy rain or snow. See program details below.

### ● Barricade gives you more

Count on Barricade to put you in control of crabgrass and other significant problem weeds. Barricade also offers a stain-free formulation. And, its low water solubility means you can count on Barricade to stay right where you put it, even on slopes and hillsides. Sprayable Barricade 65WG, Barricade 4FL, and Barricade On-Fertilizer formulations are available to meet your unique needs.

## Barricade Guarantee Program for crabgrass control for fall and spring.

### Enroll in the Barricade Guarantee Program. It's easy.

1. Purchase \$5,000 or more of Barricade 4FL, Barricade 65WG, or Barricade on-fertilizer from your Authorized Syngenta Channel Partner (distributor, agent, or formulator).
2. Enroll by choosing the timing of your Barricade application that benefits your business—fall or spring (see map as some locations are not eligible for the fall guarantee). The same acreage cannot be enrolled in both programs.
3. Apply Barricade at the proper rate, conditions, application date, and timing for your area. (Please consult maps below for details.)
4. Register online today at [www.BarricadeGuarantee.com](http://www.BarricadeGuarantee.com), or call 1-800-395-TURF.

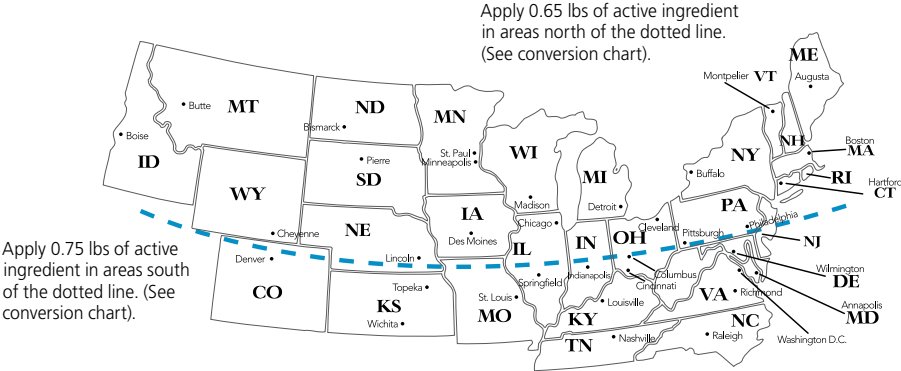

### Guarantee Terms and Conditions

Must follow label guidelines regarding application rates and timing for your region in order to benefit from the program. To qualify for the minimum purchase level of \$5,000, purchases must be made between September 1, 2008 and May 15, 2009. Barricade on-fertilizer is valued at \$25/lb of 65WG equivalent for calculating purchase level. All claims must be submitted by August 1, 2009. Syngenta reserves the right to verify all purchases. To qualify, claim form must be completed in its entirety. If you do have a crabgrass breakthrough during the period prior to August 1, 2009, a Syngenta territory manager will investigate and determine if eligible for reimbursement. "Crabgrass breakthrough" is defined as less than 85% crabgrass control as compared to untreated areas of similar turf density, turf type, environment, and weather conditions. Syngenta will reimburse only the cost, not to exceed \$80.00 per acre, of rescue treatment materials to control crabgrass in the affected area. Syngenta will not pay for the application.

## Fall application guarantee

A single fall application will control next season's crabgrass, giving you maximum application flexibility. As a result, you can spread out your workload and make next spring less hectic. You also don't have to worry about missed applications due to inclement spring weather.

Desired Rate	Barricade 65WG		Barricade 4FL	
	ai/A	lb/A	fl oz/A	pts oz/A
0.65		1.00	21	1 1/3
0.75		1.15	24	1 1/2
0.81		1.25	26	1 2/3
1.00		1.50	32	2
1.50		2.30	48	3

Apply 0.65 lbs of active ingredient per acre in the areas above the dotted line or 0.75 of active ingredient per acre in the areas below the dotted line. Applications MUST be made after soil temperature falls below 50°F but prior to the ground freeze (32°F), snow cover, or December 31, 2008. The minimum spread rate is 175 lbs of Barricade On-Fertilizer per acre as long as you achieve the minimum active ingredient per acre rate. As spray application, use a minimum of 20 gallons of water per acre with the appropriate rate of Barricade 65WG or 4FL. The Fall Guarantee is offered in these states only: CO, CT, DE, IA, ID, IL, IN, KS, KY, MA, ME, MD, MI, MN, MO, MT, NC, ND, NE, NH, NJ, NY, OH, PA, RI, SD, TN, VA, VT, WI, WY.

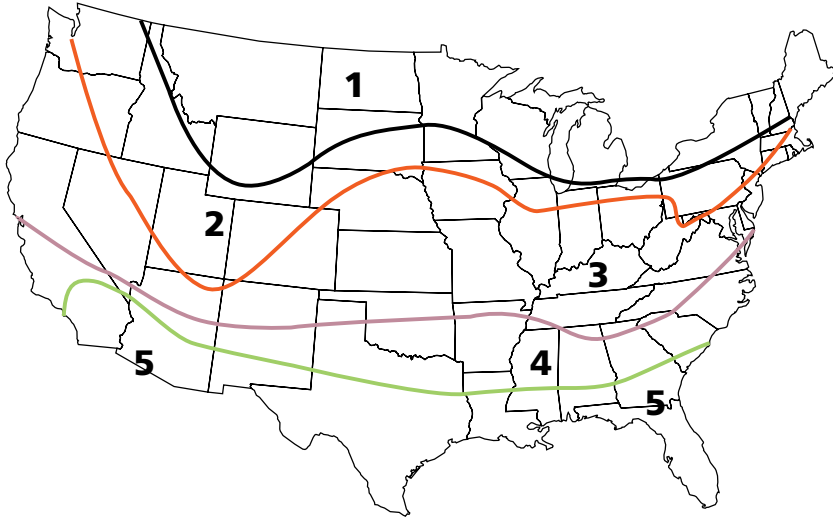

## Spring application guarantee

### Barricade zones

1. Apply by May 15. Use 0.38 to 0.5 lbs ai per A.
2. Apply by April 15. Use 0.5 to 0.75 lbs ai per A.
3. Apply by March 15. Use 0.75 to 1.15 lbs ai per A.
4. Apply by February 15. Use 1.0 to 1.5 lbs ai per A.
5. Apply by January 15. Use 1.0 to 1.5 lbs ai per A.

For split applications, apply at least 50% of rate by these dates and a second application eight weeks later. Soil cannot be frozen when applied. Temperatures must be above 32° F.

Not for use on St. Augustine or bentgrass turf.
