**Poa annua** Assurance Program for overseeded fairways

The key to protecting your overseeded fairways from *Poa annua* is use of a highly effective herbicide and growth regulator program. Barricade® herbicide plus Trimmit® 2SC plant growth regulator will provide outstanding efficacy when used as directed.

- Barricade delivers excellent pre-emergence control with a long-lasting residual.
- Apply Trimmit 2SC herbicide 60 days after perennial ryegrass overseeding. This will help stop any emerged *Poa annua*. Trimmit 2SC also reduces clippings while enhancing perennial ryegrass quality.

Here's your assurance:

- Follow the prescribed solution below on a minimum of 20 acres of bermudagrass on your golf course per 18 holes (or 10 acres if on a nine-hole course) to qualify for the Assurance Program described herein.
- If you achieve less than 90% *Poa annua* control on your treated acreage, contact your Syngenta territory manager immediately for analysis.
- Claims must be filed by April 17, 2019, with a Syngenta territory manager.

**SOUTH** OVERSEEDED FAIRWAYS (GA, AL, MS, SC, LA, NC, TN, and TX only)

For Texas:

- 6 to 8 weeks prior to overseeding, apply Barricade at 0.5–0.65 lb a.i./A.
- 4 to 8 weeks after overseeding when roots are in the second inch of soil, re-apply Barricade to total 0.85 lbs ai/A.
- Trimmit 2SC applications at 8–10 oz/A should begin at 85% cover, but no sooner than 60 days after overseeding. Use 3 applications at 30-day intervals.

For AL, LA, GA, MS, NC, SC, and TN:

- Apply Barricade at 0.5–0.65 lb a.i./A 8 to 10 weeks prior to overseeding.
- In January, apply Barricade at 0.5 lb a.i./A.
- Trimmit 2SC applications at 8–10 oz/A should begin at 85% ryegrass cover, but no sooner than 60 days after overseeding. Use 2–3 applications up to March 15.

*For complete details, please see product labels.*
For Arizona, California and Nevada:

- 6 to 8 weeks prior to overseeding, apply Barricade at 0.5–0.65 lb a.i./A.
- 4 to 8 weeks after overseeding when roots are in the second inch of soil, re-apply Barricade to total 0.85 lbs a.i./A.
- Trimmit 2SC applications at 8–10 oz/A should begin at 85% cover, but no sooner than 60 days after overseeding. Use 3 applications at 30-day intervals.

For complete details, please see product labels.

Program Terms and Conditions

The minimum application area for golf courses is 20 acres per eighteen holes (or 10 acres if on a nine-hole course). Only the use of Barricade 65WG and Barricade 4FL will be permitted. User must follow prescribed guidelines herein regarding application rates and timing for the user’s region in order to qualify. All claims must be submitted by April 17, 2019. Purchases of Qualifying Products must be made between July 1, 2018 and December 31, 2018 (“Qualifying Period”) from an Authorized Syngenta Agent or Retailer. If you notify your Syngenta territory manager of a Poa annua breakthrough, your Syngenta territory manager will investigate and, if warranted, supply Syngenta products for rescue treatment with a value not to exceed the value of the Barricade herbicide products already purchased and applied by user on the applicable acreage this season. A “breakthrough” is defined as less than 90% Poa annua control as compared to untreated areas of similar turf density, turf type, and environment. Syngenta’s determination as to whether 90% control exists will be final. Syngenta retains the right to audit purchase records in assessing assurance claims. Syngenta will not pay for any application for rescue treatments. Syngenta reserves the right to modify or discontinue this Assurance Program. The Assurance Program is offered in AL, AZ, CA, GA, LA, MS, NC, NV, SC, TN, and TX only.
