GAIN A NEW PERSPECTIVE ON LARGE PATCH CONTROL AND MORE

Ascernity® fungicide combines the advanced SDHI technology SOLATENOL® (benzovindiflupyr), with difenoconazole, the proven cooling DMI, to control more than 20 diseases including large patch, anthracnose and brown patch in cool and warm-season turf with no heat restrictions.

Ascernity fungicide is an innovative solution for protecting golf course turf that offers:

**Exceptional Disease Control**

- Delivers long-lasting control as the cornerstone of the Syngenta Large Patch Assurance Program
- Excels at controlling foliar diseases including anthracnose, dollar spot and brown patch

**Excellent Turf Safety and No Heat Restrictions**

- Safe to use on turf with no heat restrictions even in the summer when disease pressure is high
- Can be applied with no PGR effects, phytotoxicity, thinning or unwanted regulation

**Key Diseases***

- Large patch
- Brown patch
- Anthracnose
- Dollar spot

*See a full list of controlled diseases at GreenCastOnline.com/Ascernity

**Application Recommendations**

Application rate: 1 fl. oz./1,000 ft.²
Application intervals: 14-28 days

["[With Ascenity] we had absolutely no large patch whatsoever on the treated approach this year, which is the first time in 10 - 12 years with no patch."

- Matt Carson, first assistant superintendent,
The Golf Club of Tennessee,
Kingston Springs, Tennessee"]
