

Poa annua Assurance Program for Non-overseeded Fairways

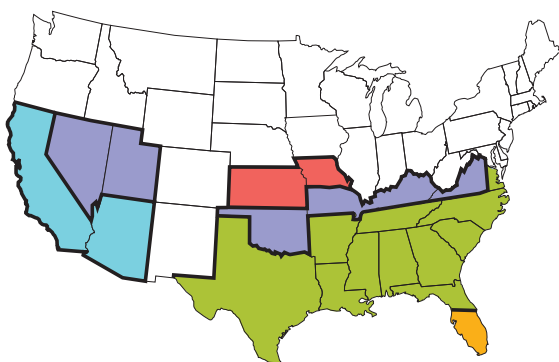

The key to protecting your bermudagrass and zoysiagrass fairways from *Poa annua* is using a highly effective control regimen. Barricade® herbicide plus Monument® herbicide can provide outstanding efficacy when used as directed.

- Barricade delivers excellent preemergent control with a long-lasting residual.
- Monument offers outstanding versatility for post-emergent control of *Poa annua* that Princep® Liquid herbicide may miss because of insensitive biotypes.
- Use at the prescribed timing and rates below to control *Poa annua* this winter.

Here's your Assurance:

- Follow the prescribed solution below on a minimum of 20 acres of bermudagrass or zoysiagrass on your golf course per 18 holes (or 10 acres if on a nine-hole course) to qualify for the Assurance described herein.
- If you achieve less than 90% *Poa annua* control on your treated acreage when used as directed, contact your Syngenta territory manager immediately for analysis.
- Syngenta will provide the appropriate Syngenta product (Princep Liquid, Monument or Reward® herbicides) required to control the remaining *Poa annua*.
- Claims must be filed by April 17, 2022 with a Syngenta territory manager.

NON-OVERSEEDED FAIRWAYS

- Apply Barricade at 1.0–1.5 lb. a.i./A + Princep Liquid at 1–2 qt./A + Monument at 10 g/A + NIS
 - Apply by Oct. 15 for western North Carolina, western South Carolina, Tennessee and eastern Virginia
 - Apply by Nov. 1 for Louisiana, Arkansas, Alabama, Mississippi, Georgia, eastern North Carolina, eastern South Carolina, northern Texas
 - Apply by Dec. 1 for southern Texas and northern Florida
- Apply Barricade at 1 lb. + Monument at 10 g + NIS by Oct. 15. Apply Barricade at 0.5 lb. a.i./A by Feb. 1.
- Apply Barricade at 0.75 lb. a.i./A by Sept. 1 and Monument at 10 g/A + NIS by Oct. 15. If only one application can be made, apply Barricade and Monument by Oct. 15.
- Apply Barricade at 1–1.5 lb. a.i./A by Sept. 15 and Monument at 10 g/A + NIS by Nov. 1. If only one application can be made, apply Barricade and Monument by Nov. 1.
- Apply Barricade at 0.5–0.65 lb. a.i./A by Sept. 15 and apply Monument at 10 g/A + NIS by Oct. 15. If only one application can be made, apply Barricade and Monument by Oct. 15.

Program Terms and Conditions

The minimum application area for golf courses is 20 acres per 18 holes (or 10 acres if on a nine-hole course). Only the use of Barricade 65WG and Barricade 4FL will be permitted. User must follow prescribed guidelines herein regarding application rates and timing for the user's region in order to qualify. All claims must be submitted by April 17, 2022. Purchases of Qualifying Products must be made between July 1, 2021 and Dec. 31, 2021 ("Qualifying Period") from an Authorized Syngenta Agent or Retailer. If you notify your Syngenta territory manager of a *Poa annua* breakthrough, your Syngenta territory manager will investigate and, if warranted, supply Syngenta products for rescue treatment with a value not to exceed the value of the Barricade and Monument products already purchased and applied by user on the applicable acreage this season. A "breakthrough" is defined as less than 90% *Poa annua* control as compared to untreated areas of similar turf density, turf type, and environment. A Syngenta determination as to whether 90% control exists will be final. Syngenta retains the right to audit purchase records in assessing assurance claims. Syngenta will not pay for any application for rescue treatments. Syngenta reserves the right to modify or discontinue this Assurance Program at any time without prior notice. The Assurance Program is offered in Alabama, Arkansas, Arizona, California, Florida, Georgia, Kansas, Kentucky, Louisiana, Missouri, Mississippi, North Carolina, Nevada, Oklahoma, South Carolina, Tennessee, Texas, Utah and Virginia only.
