

EARN YOUR MEDALLION

With an effective active ingredient and proven performance to control the toughest diseases, you can have it all when it comes to disease control.

Medallion® WDG fungicide delivers reliable, broad-spectrum control of major foliar, root and stem diseases at low use rates. As the only fungicide in its chemical class (FRAC 12) growers trust Medallion as an essential part of their disease management program.

Medallion WDG protects plants so growers can market clean, high-quality crops.

Strong performance against major diseases

Medallion WDG is a strong performer against major foliar, root and stem diseases of ornamental plants. *Fludioxonil*, the active ingredient in Medallion WDG, inhibits spores from germinating and penetrating plant tissue. Upon application, Medallion WDG binds quickly to the surface of leaves and roots, creating a barrier of protection.

With a low use rate of 1-4 oz./100 gal., Medallion WDG is an economical choice for long-lasting control when used as a soil drench or foliar spray:

- 21-28 day residual control as a drench
- 7-14 day residual control when applied to foliage
(*Rainfast within one hour of application*)

FOLIAR DISEASES (1-4 oz./100 gal.)

<i>Alternaria spp.</i>	<i>Myrothecium spp.</i>
<i>Botrytis spp.</i>	<i>Rhizoctonia spp.</i>
<i>Cercospora spp.</i>	<i>Septoria spp.</i>
<i>Cylindrocladium spp.</i>	

CROWN, STEM & ROOT DISEASES (1-2 oz./100 gal.)

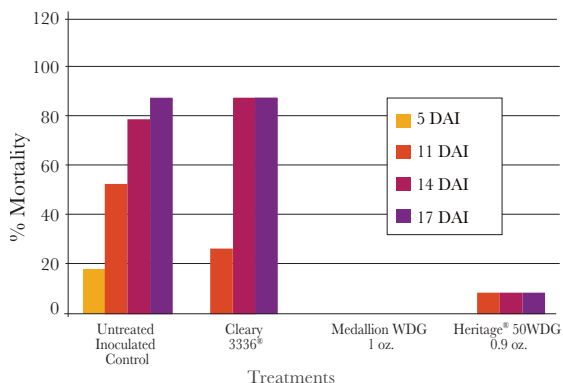

<i>Cylindrocladium spp.</i>	<i>Sclerotium rolfsii</i>
<i>Fusarium spp.</i>	<i>Thielaviopsis basicola</i>
<i>Rhizoctonia spp.</i>	

Medallion WDG is registered for use in:

- Greenhouses, shade and lath houses (and other enclosed structures)
- Outdoor field, container and conifer nurseries*
- Interiorscapes
- Commercial and residential landscapes*

*Not registered for outdoor or landscape use in Hawaii

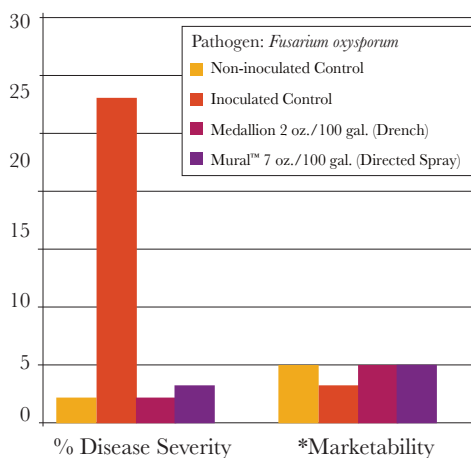

Control of *Rhizoctonia* Root and Stem Rot in Impatiens

Applied Sept. 13, 2013
Plants inoculated Sept. 15, 2013

DAI = Days after inoculation
2013 – Hand, OSU

Control of *Fusarium* Root and Stem Rot in Mandevilla

Applied twice on a 21-day interval (Oct. 29, 2015 and Nov. 19, 2015)
Plants inoculated Nov. 1, 2015
Final evaluation Dec. 19, 2015

*Number of marketable plants out of 5 units
2015 – Palmateer, UF-TREC

The industry standard just got better

With its unique formulation, Medallion WDG is easy to:

- **Measure:** Growers can easily measure the exact amount needed
- **Mix:** Disperses in water with gentle agitation
- **Use:** Can be applied as a soil treatment, foliar spray or bulb or corm dip, for curative **or** preventive control
 - Drench at seeding or transplant to protect young plants or unrooted cuttings from root diseases
 - Incorporate into growing media prior to transplant
 - Apply through irrigation systems (i.e. chemigation)
 - Spray

Essential part of rotation and resistance management programs

Medallion WDG can be used at seeding through final production to protect your greenhouse and nursery plants. With its unique mode of action and broad-spectrum activity, Medallion WDG is a key rotational tool for your disease management program.

Tank-mix Medallion WDG with Subdue Maxx® fungicide (FRAC 4) for comprehensive protection against major root and crown rot pathogens including *Pythium*, *Phytophthora*, *Rhizoctonia*, *Fusarium*, *Cylindrocladium*, *Thielaviopsis* and *Sclerotium rolfsii*.

Medallion WDG is an excellent rotation partner with Mural™ fungicide (FRAC 11 & 7) to protect crops from key foliar, crown, stem and root diseases.

Use Medallion WDG in rotation with Mural to protect mums from *Fusarium* and other serious diseases.

Medallion WDG: The whole package

- Reliable protection against key root, stem and foliar diseases
- Easy-to-use WDG formulation for simple measuring, mixing and application
- Proven performance at low use rates
- Both contact and preventive activity
- Important rotational tool for control of black root rot (*Thielaviopsis basicola*)
